

***“Improving
nutrition,
decreasing
disease.”***

Across the country, preventable conditions such as high blood pressure, obesity, and diabetes are often directly related to poor nutrition. Public health nutritionists develop strategies that improve access to healthy and affordable food and nutrition-related care for those who need it most. Let others know what we do by using the catchy sound bite above. Together, let's spread the word!

See it. Say it. Share it.
